

Cutting Tools

株洲大有新材料有限公司

ZHUZHOU OTOMO ADVANCED MATERIAL CO.,LTD

ABOUT OTOMC

Located in Zhuzhou China, where a city famous for its tungsten carbide industry, we, Zhuzhou OTOMO Advanced Material Co., Ltd, a Manufacturers Representative Company which has devoted 10 years to overseas market and full line Supplier of CNC cutting tools and CNC cutting tools accessories.

As an ISO900 certified company, we specialized in supplying CNC inserts, end-mills, drills, shims, CNC used screws, clamps and other CNC accessories.

Our products are widely used in machinery, electronics, chemical industry, construction, aerospace and other industries. Now OTOMO products exported to more than 80 countries and regions of the world.

This is where working with a trusted cutting tool & metals supplier who can help to ensure that your requests are covered. By gathering insight from the right individuals and department representatives, accurately calculating the costs and choosing the right cutting tools & accessories & metals, we can ensure that your investment and its outcome will be well worth it.

Contact OTOMO to discuss your CNC tools needs today!

EQUIPMENTS

The company has a full set of high-level producing equipment ranging from raw power material preparation, mould manufacture, pressing, pressure sintering, grinding to post processing. We use spray drying tower in mixing process. Its advanced technique ascertains the best performance behavior of material in physical property and formability.

Using powder compacting press with Electro-Servo Motor Direct Drive, the most advanced machine for press shaping in the world, which meet the high requirements on precision, performance and stability. For sintering, we equipped the most advanced devices to meet the quality requirements on chemical and physical performance.

For grinding and machining, we equipped Fully auto CNC periphery insert grinder, CNC two-wheel flat lapping machine etc. to ensure product shape and precision demand. We also use the most advanced PVD/CVD coating machines. The state-of-the-art sub-sequence process devices equipped for better performance.
